

Zoom is a video conferencing software that allows teachers to hold “meetings” (classes), manage the participants and share your screen. Zoom has already been installed on your school computer.

Your teachers have added a Zoom link to each of your classes in PowerSchool. The link might be on the class homepage, or on a separate page of its own. **USE GOOGLE CHROME** and Click the link to join the class. Unfortunately, some students have trouble opening the link in Safari.

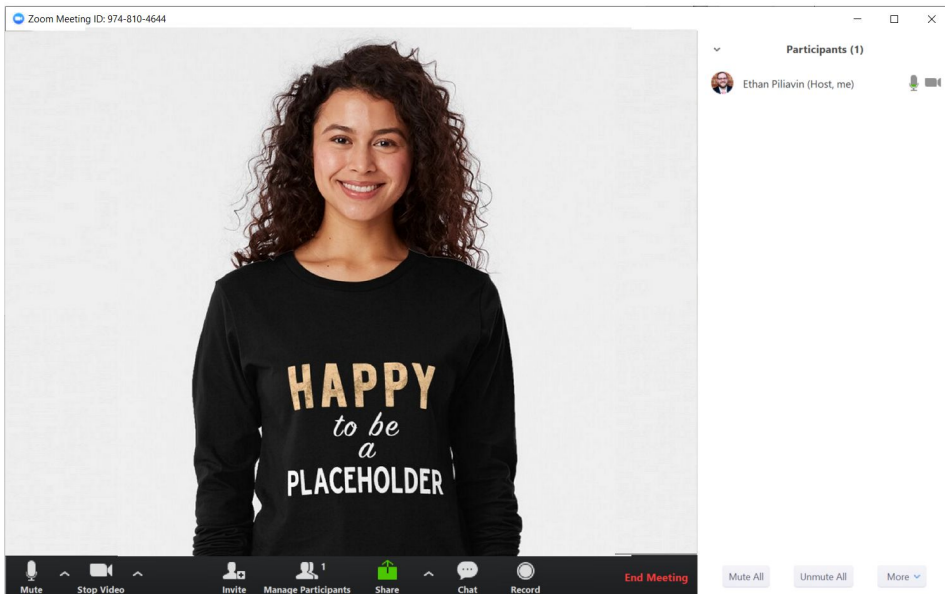

Once you click the link, a popup will appear. (If it doesn't, make sure you are in Chrome!)

Click the white button to: **Open Zoom Meetings**

Next, the Zoom application will open on your computer. Make sure you click the button to **Join with Computer Audio** so you can hear the teacher and ask questions.

LEARNING WITH ZOOM: WHEN IN CLASS

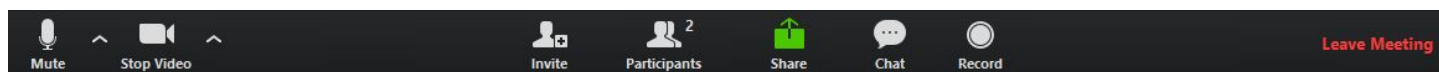

Congratulations!
You are now in class.

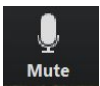

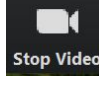

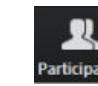

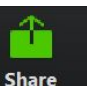

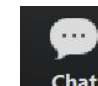

Be sure to login to each class at the same time as your regular YULA Girls schedule.

Attendance will be taken based on Zoom login.

When you are in class you have a **control bar** at the bottom of the screen:

The control button lets you interact with the class in a few interesting ways:

 Mute Silence your own microphone	 Stop Video Start/Stop your own video	 Invite Send an email invitation with link	 Participants See who's connected See Below: 1) Raise Your Hand	 Share Share your screen..	 Chat Open the chat window for typed conversation	 Record Save a recording of this session	 Leave Meeting Disconnect from class.
--	--	---	---	---	--	---	--

To raise your hand, open the **Participants** window and click the **Raise Hand** button:
